

## ROOFING MATERIAL

### EMERGENCY CONTACT:

Salt River Roofing

307-885-3084

#### Roof type

- The roof is a EPDM single layer rubber roof.
- The roof should be protected from any petroleum based solvents or other strong solvents.
- The roof has a 2 year warranty that ends on 4/30/2014.
- The EPDM roof is designed to be maintenance free. It is not intended that snow and ice build-ups be removed by shoveling as the use of shovels will puncture the membrane.
- The architect's design did not include gutters and down spouts for the purpose of water drainage from the roof. Although, OSM did install electrical j boxes in several eave locations in the event that snowmelt/gutters & downspouts need to be added in the future.
